

Childs name:

Date:

Indicators for Foster Care/Substitute Care placement outside the home. * <i>(Mark yes or no if the patient meets criteria)</i>	Yes	No
1. Parent/guardian has not obtained or provided a designated personally known caregiver to assist with managing diabetes care.		
2. Parent/guardian has not obtained or provided insulin or other diabetes supplies to a designated alternative caregiver (or school) on two or more occasions, and without extenuating circumstances.		
3. Two or more episodes of DKA or other diabetes-related hospitalization in less than 14 days, because of non-adherence to daily management.		
4. Two or more episodes of DKA in a single 12-month period (related to non-adherence or lack of supervision).		
5. Three or more emergency department visits related to non-adherence to diabetes treatment in a 12-month period.		
6. Parent/guardian is only compliant to needed diabetes cares with persistent involvement of support teams (provider, social work, nurse case manager, etc.).		
7. Parent/guardian cannot demonstrate important skills or changed behaviors despite renewed education and supervision.		
8. Parent/guardian practice rigid nutrition or medication beliefs that have adversely affected child's health. Behaviors are not alleviated with substantial education by diabetes team and/or the child protection investigator.		

Childs name:

Date:

9. Parent/guardian in need of mental health or substance abuse treatment that is refused, causing parent to be incapable of managing the child's diabetes safely.		
10. Failure of parent/guardian to bring a child having difficulty coping with diabetes management to recommended mental health care.		
11. Stagnant or increasing HbA1c despite intensive case management.
